

For their work on the Bark River Wetlands restoration project in Dousman, WI, Wondra Construction received the ABC Excellence in Construction Eagle Award for a sitework/landscape/hardscape project in the specialty contractor category.

Wondra removed drainage infrastructure, filled seven ditches and installed four spillways—as well as deployed GPS machine control equipment to move more than 240,000 cubic yards of dirt—during the four-month restoration of a 1,600-acre farm.

Wondra Construction is a nationally recognized leader in natural resource conservation services. Wondra’s methodical use of GPS-controlled grading equipment allows their team to effectively adapt to wetland restoration projects of any scale.
