

2009
PROJECTS
of Distinction

- **OWNER:**
Butler Ridge LLC
- **DESIGN FIRM:**
STS AECOM

The Butler Ridge Windfarm is located at the intersection of highways 33 and P in Dodge County and comprises 36 wind turbines. The project required building 8.5 miles of access roads along the rolling farm hills of Dodge County. During the first two weeks on the project, more than 12 inches of rain fell, affecting ground conditions, erosion control procedures, roadway construction, soil stability and workforce mobility. Wondra Construction's safety and training program allowed it to bid on the project and the company's commitment to safety and training throughout the project exceeded expectations. Though Wondra encountered many obstacles during the project, it met all challenges head-on with decisive actions and timely solutions, keeping safety as the first priority.
